Examiner's signature, if required

Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant proposed amending the claims to positively recite that the porous network of the zeolite contains a Group VIb metal. The examiner indicated that such an amendment appeared to overcome the various rejections under 35 USC 103 over Pollitzer in view of Jan, set forth in the final office action mailed 10/17/02. However, the examiner indicated that such an amendment would not be entered after final, as it would require further search and/or consideration. Applicant also provided a Declaration to replace the facsimile copy sent 1/7/03. The original Declaration has been attached to the Interview Summary Sheet.
